1. BACKGROUND

1.1 Strategic aims and values

The strategic aims and values of the programme are unchanged and are:

- People at the centre of all that we do
- Empowering people to stay healthy
- Developing a sustainable health and care system
- Improving quality, improving outcomes

2. MAIN ISSUES

2.1 The strategic planning process

Cambridgeshire and Peterborough Clinical Commissioning Group (CCG) is leading a system wide process, to agree a joint plan across the local health economy that will improve outcomes for people and enable financial sustainability. This process involves providers, partners and patients and has four phases.

The programme is currently in Phase 2. The key elements for this phase are:

- Detailed analysis of the issues facing the health system, working with key stakeholders about areas of challenge.
- Engagement with the public around the key challenges facing the health system now and into the future. A copy of the Fit for the Future leaflet is attached to this report which outlines the key messages.(appendix A)
- Getting feedback from the public about current services and how they think things could change.(appendix B)

Between October 2015 and December 2015 there will be a second phase of engagement that focuses on discussing the potential solutions and ideas for change.

Programme activity from Jan 2016 onwards will depend on the outcome of the engagement process. The earliest that any formal public consultation is likely to take place is early 2016.

2.2 Second wave of “Vanguard” site applications

The NHS England New Models of Care Programme aims to co-design different types of new care models for the NHS. More details of these models can be found in the “Five Year Forward View“. The link is in the ‘Source Documents’ table below.

In January the Cambridgeshire and Peterborough System applied to be a Vanguard site as part of the first wave. The application was shortlisted, but was not finally selected. NHS England has now launched a second stage application process that centres on collaboration between acute hospitals. A link to the NHS England Acute Care Collaboration website is in the ‘Source Documents’ table below.

The closing date for applications is 31 July 2015 and the System Transformation Programme will consider whether to apply.

3. SIGNIFICANT IMPLICATIONS

3.1 Resource Implications

There are no significant implications within this category.

3.2 Statutory, Risk and Legal Implications

There are no significant implications within this category.

3.3 Equality and Diversity Implications

There are no significant implications within this category. Work is in progress to ensure that any ideas for change across the system will be subject to the required impact assessment processes, prior to any further engagement work planned from September onwards

3.4 Engagement and Consultation Implications

There are no significant implications within this category. A programme of events are planned as part of the pre-engagement phase, via Saturday cafés, and a Public Involvement Assembly to generate discussion about why the health system needs to change and to hear the views from local residents and the local workforce. Work is in progress to ensure that engagement plans are approved, prior to any further engagement work planned from September onwards.

3.5 Localism and Local Member Involvement

There are no significant implications within this category. Please see 3.4

3.6 Public Health Implications

There are no significant implications within this category. Work is in progress to ensure that any ideas for change across the system will be subject to the required impact assessment processes, prior to any further engagement work planned from September onwards.
