## 1 The countywide context for the Network Service Plan: the Cambridgeshire Sustainable Community Strategy

In early 2010, Cambridgeshire County Council (CCC) approved a new Integrated Plan and the following identifies how highway infrastructure and maintenance work contributes to the objectives of the plan. In introducing the plan the Council Leader made the following comments:

During 2009 alone, we:

- reduced the number of children killed or seriously injured on our roads;
- increased the number of local bus passengers by over 2 million;
- have been voted Transport Authority of the Year.

The Network Service Plan contributes to the following strategic objectives of the authority:

- Enabling people to thrive, achieve their potential and improve their quality of life;
- Supporting and protecting vulnerable people;
- Managing and delivering the growth and development of sustainable communities;
- Promoting improved skill levels and economic prosperity across the county, helping people into jobs and encouraging enterprise;
- Meeting the challenges of climate change and enhancing the natural environment.

A more detailed explanation of these objectives can be found in the Integrated Plan at: [www.cambridgeshire.gov.uk/council/policies/integratedplanandpolicyframework.htm](http://www.cambridgeshire.gov.uk/council/policies/integratedplanandpolicyframework.htm)

In addition the delivery of the Network Service Plan will be in line with our commitment to local people and our partners as follows:

We will always try to act according to our values:

- **Accountability** – we will be open and transparent, listening and communicating clearly and taking responsibility for our actions.
- **Respect** – in working with each other, our partners, residents and service users, we will treat each other as we would like others to treat us, recognising and embracing differences and taking account of the full range of opinions.
- **Integrity** – we will behave honestly and demonstrate reliability by promising only what we can deliver and delivering what we promise.
- **Value for money** – we will balance cost and quality to make sure that all our resources make the maximum possible impact.
- **Excellence** – working with partners where appropriate, we will ensure you receive services of the highest quality.
- **Equity** – we will treat people fairly, valuing and responding to their diverse backgrounds and needs.

We apply the following principles across all areas of our work:

- **Focus on delivering high-quality effective and efficient services** – we will make sure that we deliver the highest possible quality of services for the lowest cost. We want to make sure that inefficiency is removed so that we have as much money as possible available for delivering services.
- **Listen and be responsive to the needs of Cambridgeshire communities** – we will make sure that you have opportunities to be involved in designing and planning services, and influencing the decisions we take. We will always listen to your opinions and we will work with you to develop services that meet your needs.
- **Work in partnership to achieve a shared vision for Cambridgeshire** – our ambitions for the county are only achievable by working together in partnership at all levels, starting with local communities. We will therefore work with a wide variety of partners to work out how we can deliver the best possible services by working closely together.

The delivery of the Network Service Plan contributes to the performance indicators that can be found on page 37 of this document.

## **2 Delivery of Cambridgeshire's Local Transport Plan**

- 2.1 The Capital Programme is funded principally from Central Government with additional funding from capital receipts and contributions from other local authorities, agencies and developers. See table in section 23.
- 2.2 The programme includes road and bridge maintenance and for a range of integrated transport schemes being implemented. These include safety schemes, delivery of the Market Town and Cambridge Access Strategy schemes, bus priority measures, cycling and walking schemes, Safer Routes to School, speed management measures and Streetscape measures.
- 2.3 The winter was the coldest for about 30 years with two periods of lying snow and persistent sub-zero temperatures day and night. With an already deteriorating network, these conditions will result in further deterioration at an increased rate.
- 2.4 The Street Lighting PFI (Private Finance Initiative) project is progressing well within expectation that it will be in a position to appoint a preferred bidder in early summer and award at the end of the year.
- 2.5 CCC produced and adopted the first Rights of Way Improvement Plan (ROWIP) in the country as part of the Local Transport Plan (LTP), winning a high score from the Department for Transport (DfT) for so doing.
- 2.6 Climate Change and Sustainability present significant challenges. The County Council has a Climate Change and Environment Strategy, with an accompanying Action Plan that is due for review during 2010. As part of this, an assessment of climate risk across the organisation has been conducted, and during 2011 will result in a plan to ensure the Authority, including all transport and network services, is prepared to adapt to the changing climate. Also as part of the Council's overall carbon management, Highways and Network services are required to provide carbon dioxide emissions data from operational transport use and energy (e.g. for street lighting) for National Indicators (NI) 185 (percentage CO<sub>2</sub> reduction) and NI 194 (Air Quality).

- 2.7 Cambridgeshire Highways has a Sustainability Plan, Environmental Management Plan and Site Waste Management Plans in place to support our objectives; to reduce waste to a minimum, reuse and recycle as much as practicable, and to minimise consumption of natural resources. Their annual Carbon Footprint Report measures energy and fuel consumption for facilities and transport.

### **3 Cambridgeshire Guided Busway**

- 3.1 The Guided Busway from Cambridge to St Ives is substantially completed and will open when the Contractor has completed rectifying defects, with the southern section to Trumpington and Addenbrooke's following later in the financial year. Work is ongoing at Cambridge Railway Station, Hills Road and Trumpington. The Busway includes new Park and Ride sites at St Ives and Longstanton. Buses will run every ten minutes throughout the day from St Ives to Cambridge, with buses running every 20 minutes from Huntingdon and additional services from Somersham.

#### **3.2 Huntingdon to St Ives On-Street Bus Priority Measures**

These measures were developed jointly by the County and Huntingdonshire District Council, to improve both local public transport and to extend the benefits of the Guided Busway from St Ives to Huntingdon and are integrated with the Market Town Strategy.

The measures consisted of five separate bus priority schemes along the route. These were reviewed by County Council Cabinet in November 2008. The revised priorities for implementation, shown below, have been agreed and the measures are being implemented as soon as funding is available.

The current position is as follows:

<b>Section</b>	<b>Scheme</b>	<b>Funding</b>	<b>Current Position</b>
George Street / Walden Road, Huntingdon	Contra-flow bus lane to bus station		Completed July 2007
Hinchingbrooke Park Road Brampton Road junction	Priority bus and emergency vehicle lane		Deferred
Old Houghton Road, Huntingdon	Bus only road and cycle measures	Local Transport Plan 2009/2010	Completed February 2010
Houghton Road, St Ives	Bus lane and cycle way	Local Transport Plan and developer funding	Deferred until linked developer proposals and funding come forward
Hartford Road, Huntingdon	Bus lane and cycleway	Local Transport Plan onwards and developer contributions	Bus priority cancelled; Cycleway elements delivered through the Market Town Strategy

## **4 Housing Growth Fund / Community Infrastructure Fund**

Cambridgeshire Horizons has provided support and administration of funding from the Housing Growth Area Fund (HGF) to support development in Cambridgeshire during 2008-2010. Savings of some £6m have had to be made in future funding. This has resulted in the early ending of three rights of way and access projects around Northstowe, Cambridge and St Neots with effect from 1 April 2010.

Transport projects that benefited from this funding in 2009/2010 were:

- Countryside access around Northstowe;
- Cycle routes around Northstowe;
- Busway cycle route.

Following the announcement last year that government would cut the 2010/2011 HGF allocation, the 2010/2011 allocations for the above have been reduced.

The County Council was successful in being allocated £3m from the Community Infrastructure Fund (CIF2) for the Cambridge Gateway Project. The Cambridge Gateway Project will deliver a new bus, pedestrian and cycle access to Cambridge Railway Station from an improved junction of Brooklands Avenue and Hills Road. The funding lasts until March 2011 with construction starting early 2010. Further funding has been allocated to improve the bus interchange at the station.

## **5 Asset Management**

5.1 LTP2 Guidelines require all Highway Authorities to develop Transport Asset Management Plans (TAMP). These will be informed by LTPs and other services and corporate plans. The TAMP will enable the authority to:

- support the corporate provision of detailed information on all transport assets held by the Authority;
- establish and communicate a clear relationship between the programme set out by the TAMP and the Authority's LTP targets and objectives (including the ROWIP) and ensure existing assets are in a condition compatible with the delivery of the LTP;
- obtain and organise financial information to support the requirements for the CIPFA Transport Infrastructure Assets Code;
- enable the value for money for all transport asset maintenance to be considered more effectively against other local transport spending, and eventually assist Local Transport Strategy and Plan production.

5.2 Cambridgeshire's TAMP is developing well and work continues to progress and improve it.

5.3 Work is progressing in developing LTP3 (2011 to 2016) in accordance with the DfT guidelines.

## **6 Highway Maintenance**

Maintenance teams have adopted a more rigorous use of Asset Management data when prioritising maintenance scheme bids into a works programme. Further data is being captured which will facilitate the development of a provisional rolling three year maintenance programme, ensuring that maintenance budgets are allocated to

achieve maximum return on the investment. A rolling three year maintenance programme will also create greater opportunities for coordinating and programming maintenance work with other programme areas, such as traffic management schemes to reduce scheme costs. The impact of the severe weather on the county road network during the last winter period has been taken into account when preparing the works programme.

## **7 Traffic Management Act 2004**

- 7.1 The Traffic Management Act gained Royal Assent in July 2004 and covers the following two key areas:
- A change in emphasis on how the Highways Agency (HA) operates moving it from building and maintaining roads to including the management of traffic in a more direct way.
  - To provide Highway Authorities with more powers to manage the highway network and minimise disruption, particularly in the field of Street Works coordination.
- 7.2 The Traffic Manager has developed an Intelligent Transport Systems strategy to manage congestion and to provide information to enable the public to make informed travel choices. The first stage of the Integrated Highway Management Centre and associated on-street infrastructure is scheduled for implementation in mid 2010.
- 7.3 Details of a common permit scheme for street works are being developed across the region with a view to presenting a business case to Government in 2010.

## **8 Bridge Management**

- 8.1 Bridge maintenance continues to be important, not only to safeguard structural integrity but also to avoid deterioration, which would inevitably lead to much more costly work in the future or possible restrictions on use. This is particularly true of many of our older bridges, some of which are listed structures or designated as scheduled ancient monuments.
- 8.2 The capital allocation of £2.36m will allow work to commence on the strengthening and refurbishment of Freedom Bridge Retaining and Flood Wall, Nene Quay, Wisbech. Work will also commence on the refurbishment of sub standard brick arch bridges to bring them up to standard. These include the mill bridges between Offord Cluny and Buckden and the River Cam Bridge at Shingay cum Wendy. Repairs to the revetment to Whittlesford River Bridge on the A505 will also continue. A further joint scheme with the University of Cambridge will see the continuation of a project about the future management of their redundant weak 3 tonne weight limited structures between Haslingfield and Barton, and Comberton and Harlton.
- 8.3 Bridge Maintenance policy issues that need to be addressed in relation to this budget include the following:
- The safety issues at the interface between road and rail bridges in light of the Selby rail disaster. All interface bridges have been jointly risk assessed by CCC and Network Rail and a programme of measures agreed with possible joint funding;
  - The new national bridge inspection guide and bridge condition index;

- The new Code of Practice for the Management of Highway Structures.

8.4 Current funding will also allow a start to be made on the refurbishment of three of the 55 arches to the grade 2\* listed St Ives Flood Arches which provide important access to St Ives.

## **9 Cycleways**

- 9.1 Cycleways are funded from a variety of sources. These include the Capital Programme budget, District Councils, Section 106 contributions from developers and a variety of external funding streams such as the HGF, Cycling England and Sustrans.
- 9.2 In addition, cycling projects are included within the Market Town Strategies, with the emphasis on improving modal share by providing coherent networks.
- 9.3 The successful bid by CCC, in partnership with Cambridge City Council and South Cambridgeshire District Council (SCDC), to become a Cycling Demonstration Town has provided £3.6m of additional funding, which will need to be match funded up until April 2011. The bid was not only for the City but importantly included the necklace villages within a five mile radius of Cambridge.
- 9.4 The Cycle Cambridge team have consulted on the following schemes: Abington to Babraham to Sawston, Hills Road Bridge, Harston to Trumpington, Milton, Impington, Cottenham to Histon (B1049 improvements), Fen Ditton to Horningsea, Babraham Park & Ride to Wandlebury, Cherry Hinton Road, Madingley Road, Gilbert Road and The Tins. This has included manned exhibition events, leaflet (including feedback form) distribution and local media interest (radio and press coverage).
- 9.5 The programme of works, where applicable, for 2010/2011 is included in the works programmes section.
- 9.6 A series of targeted marketing campaigns and promotional events are planned until March 2011 focusing on key groups - young women, families, schools and work places. As new/improved cycle routes are built, local community groups will be involved in events to help raise awareness of the facilities. Various information on cycling including local cycle routes, bike security and adult cycle training is available both online (CCC website and local media websites) and in printed formats as leaflets and guides.

## **10 Protected Road Verges**

There are a number of protected road verges throughout the county that provide valuable habitat for a wide range of important wildlife. This importance has led to a number of these sites being designated as nationally important Sites of Special Scientific Interest (2), and locally important County Wildlife Sites (43) or Protected Road Verges (29). The Council has a statutory duty to protect and enhance biodiversity and positive conservation management contributes to achievement of NI 197.

## **11 Public Rights of Way**

- 11.1 Cambridgeshire's early adoption of the country's first ROWIP, presented an exciting but challenging opportunity to develop the rights of way network as part of an integrated approach to Network Management and Sustainable Travel Development.

The last 12 months have seen an expansion of work with the Travel for Work Partnership and Safe Routes to School Initiatives as part of the ROWIP and in line with the top Local Area Agreement (LAA) target indicators on obesity and climate change.

- 11.2 Schemes to improve path users' safety through crossing and verge improvements will be continued as will improvements to rights of way that provide access to local services. The loss of HGF funding will curtail the number of improvements that can be made, but the standards and good practise developed through the HGF Projects should enable those schemes where funding is available to be brought forward more quickly. A prioritised programme of path improvements to widen travel choice will be delivered through joint working with other parties.
- 11.3 Funding has been provided to support an ongoing programme of restoration and traffic management on the county's byway network. These routes are open to all traffic but are primarily used by walkers and riders. Cambridgeshire has over 500 byways, one of the highest numbers for any county in the country. These routes are of historical and natural history significance and are coming under increasing pressure from a range of users. Joint working with other statutory and voluntary bodies is essential to address these pressures in a sustainable and beneficial way. Ongoing survey work will inform future management work and investment plans as well as identifying opportunities to enhance quality habitats. Two droves which have been the subject of restoration work are being monitored with a view to designation as County Wildlife Sites because of their biodiversity. Traffic management on seasonally closed byways is an increasing pressure which will require management.
- 11.4 Management of annual vegetation growth on the path network remains a challenge. Increasingly wet and warmer summers combined with milder winters see little slowing in the rate of vegetation growth. Paths that require cutting are cut twice a year in April/May and June/July. Ideally paths would be cut three times a year. Climatic changes and budget limitations mean we will have to review the timing of these cuts. As well as the County Council's tendered contract, we have contracts with farmers and Parish Councils to undertake path maintenance. An additional cut was established in 2009 to provide specialist cuts for the paths crossing Sites of Scientific Special Interest (SSSI) in collaboration with Natural England.
- 11.5 Focused campaigns to address rights of way problems as a result of cropping and ploughing will be continued with farming organizations. The Highways and Access Enforcement Officer has given significant time to these issues and has also helped addressed a significant number of long standing path obstructions to re-open sections of the network.
- 11.6 Although HGF funding has been stopped, work completed with HGF funding on the Northstowe rights of way network compliments other access work which will continue i.e. linkage to the Guided Bus bridleway/cycleway and associated sites.
- 11.7 The significant level of development and growth in Cambridgeshire will require ongoing staff input to ensure public rights of way are properly protected and where possible enhanced. This will protect the existing rights of way network and create the non-motorised infrastructure required to meet the future needs of residents.
- 11.8 Work will continue to improve the quality of the Definitive Map and Statement. Phase 1 of the Consolidation Project has been completed. Phase 2, the making of legal orders, has commenced.

- 11.9 Skills within the team will be used to help deliver travel plans for local employers in collaboration with the Travel for Work Partnership. The team is also supporting road shows and providing employer specific information to compliment the mapping already provided. Over the next 12 months, the team will be working with a further two schools to encourage walking and physical activity as part of the LAA targets on travel health and childhood obesity.
- 11.10 Over the next 12 months, further data will be collated and improved in order to add to contribute to the Transport Asset Management planning process. A recently developed database will enable better records to be kept that will not only inform the TAMP but will also assist the day to day management of individual assets and the quality of information that we can supply to users.
- 11.11 A priority for the next 12 months will be to ensure users have better access to information over the web in accordance with Government guidance, to test out new technologies for data capture, and to increase the level of public awareness and use of the path network in support of health and climate change agendas. Increased effort in promotion and communication of key messages in partnership with others will support these aims.
- 11.12 Since 2 March 2010, all queries for the service have been directed through to the Contact Centre, who is providing access to information and services over a wide range of hours. An initial increase in resources will be required to develop staff, systems and information in line with the revised business processes required for the Contact Centre.

## **12 Smarter Choices**

- 12.1 One third of Cambridgeshire's CO2 emissions are from transport, and NI 186 (reduction in CO2 emissions per capita) is a target in the Local Area Agreement. Modal shift away from single occupancy car use has an important role to play in reducing emissions and therefore implementation and promotion of 'Smarter Choices' is fundamental.
- 12.2 Smarter choices are techniques for influencing people's travel behaviour towards more sustainable options such as encouraging school, workplace and individualised travel planning. They also seek to improve public transport and marketing services such as travel awareness campaigns, setting up websites for car share schemes, supporting car clubs and encouraging teleworking.
- 12.3 Officers within Environment Policy & Projects will continue to work with colleagues across the organisation to actively reduce single occupancy car use through a programme of smarter choices projects to encourage walking, cycling and public transport use. Projects and promotions include CamShare (the online car sharing facility open to all Cambridgeshire residents), WalkIt (an online walking journey planner), securing residential travel plans through the planning process, and subsidising adult cycle training.
- 12.4 The Service works closely with the independent Travel for Work Partnership who work with employers across Cambridgeshire to implement travel plans and take up of sustainable modes for commuter and business travel.

### **13 Street Lighting**

Street Lighting Maintenance policy will be revised so that it complies with the output specification for the PFI project.

- The Street Lighting PFI project has progressed through two of the three procurement stages and is programmed for contract award at the end of the year;
- The Council unmetered supply energy prices are still high; however we are trialling the use of 'dimming' technology which reduces energy usage. When this technology is used in the PFI project, there should be significant saving achieved in both energy and carbon emissions.

### **14 Traffic Management**

14.1 Minor Highway Improvement schemes, some of which are jointly funded between the County and District Councils and also receive a contribution from the local Parish Council, will continue to be delivered through the year.

14.2 Almost all communities in the County now have either a 30 or 40 mph speed limit. This year's speed management budget will be used to fund the third year of a four year programme to review all speed limits over 30 mph on the 'A' and 'B' road network in line with Government guidance.

### **15 Market Towns**

The implementation of the Ely, Huntingdon and Godmanchester, March, St Neots, St Ives and Wisbech Transport Strategies will continue. Schemes to be delivered in 2010/2011 will be focused on one or more of the following areas:

- Highway Safety;
- Walking & cycling;
- Public Transport;
- HCV movements.

The Highways and Access Directorate will also assist in the review of the Transport Strategies for the Market Towns.

### **16 Safer Routes to School**

16.1 The Safer Routes team will be actively working with approximately 50 schools progressing initiatives and infrastructure measures to reduce the number of pupils travelling to school by car. Physical measures will be provided at eight schools over the course of the financial year.

16.2 Work will also continue on the successful implementation of the of the Government's school travel plan initiative. Funding has been received from the Government for 2010/2011, and the County Council's School Travel Advisors will be reviewing existing plans, working with independent schools who have not yet written a plan and implementing a national travel plan accreditation scheme with Cambridgeshire schools.

## **17 Pedestrian Crossings**

Subject to policy requirements pedestrian crossings will continue to be funded from the budget for minor accident remedial measures at sites where there are three or more injury accidents involving crossing pedestrians or cyclists during the previous three years. Crossings can also be provided, where appropriate, from the Market Towns, Safer Routes to School or Jointly Funded Minor Highway Improvement budgets.

## **18 Road Safety**

Priorities for Road Safety include:

- Improving road user behaviour through Education, Training and Publicity programmes;
- Encouraging businesses and employers to implement appropriate policies and procedures for managing the safety of their staff, whilst travelling for work;
- Working in partnership with the Police and other Strategic Agencies via the Cambridgeshire and Peterborough Road Safety Partnership (CPRSP);
- Developing programmes to reduce the number of young drivers, and riders, killed or injured on the County's roads;
- Developing programmes to reduce child road casualties, with particular emphasis on issues of social disadvantage;
- Continuing to fund appropriate fixed and mobile safety camera sites;
- Targeting remedial measures at those collision sites that will give the highest casualty reduction in line with recognised best practice.

## **19 Traffic Signals**

Priority issues for the Traffic Signals Team are:

- Maintaining existing traffic signals which have been installed to reduce accidents, to implement bus priority and to improve facilities and safety for all road users especially cyclists and pedestrians (including those with disabilities);
- Maintaining, operating and developing existing and new traffic signal related systems to ensure the expeditious movement of traffic on the network;
- Increasing the proportion of pedestrian crossings with facilities for the disabled;
- Addressing the need to replace older and obsolete traffic signal installations. More than 73 installations are more than 15 years old (the specified minimum design life) and this figure will increase on average by over 15 installations per year over the next five years;
- Ensuring new traffic signal installations (designed internally and externally) encompass the County Council's objectives and comply with current standards both national and local.

## **20 Data and Information**

Priority issues for the Information Team are:

- Compiling and managing road casualty and collision data;
- Undertaking research to guide casualty reduction policies;
- Identifying collision problem sites for investigation;
- Managing the County's traffic census and monitoring traffic trends;
- Managing performance information across the Office;
- Monitoring key transport indicators to support the LTP.

## **21 Projects Team (South and City)**

Priority issues for the Projects Team South and City are:

- Developing demand management measures including the potential to extend the principles of the Cambridge Core Traffic Scheme to other areas;
- Developing increased City Centre bus stop and interchange capacity;
- Improving access by bus to and within Cambridge and along the key corridors serving the city.

### **21.1 Parking Team**

Following the transfer of responsibilities for parking enforcement from Cambridge City Council to the County Council, the Parking Team will focus on embedding the new arrangements for civil parking enforcement in Cambridge and supporting work with other districts to explore extending operations outside Cambridge.

## **22 Asset Management - The Cambridgeshire Road Network**

### **22.1 Road Network**

There are 4,691km (2,915 miles) of road in Cambridgeshire:

280km	(174 miles)	Trunk and Motorway
175km	(108 miles)	of County Primary Roads
306km	(190 miles)	Main Distributor Roads
318km	(198 miles)	Secondary Distributor Roads
860km	(535 miles)	Link Roads
2752km	(1710 miles)	Local Access Roads

2214km of the 4,411km network maintained by the County Council are in urban areas. There are 3,869km of footways alongside urban or rural roads and in addition there are 3210km of footpaths, bridleways and byways providing opportunities for sustainable travel, health and recreation.

## 22.2 Rights of Way

Footpaths	2267km
Bridleway	541km
Byway	402km

## 22.3 Bridge Structures

Road bridges	1,500
Rights of way bridges	2,200

## 22.4 Street Lighting Columns

County Council total	58,670
Illuminated Signs	3,886
Illuminated Bollards	2,305

## 22.5 Traffic Signals & Systems

There are 330 Traffic Signal Installations in Cambridgeshire, the split of which is:

Traffic Signal controlled junctions	134
Pelican Crossings	100
Puffin Crossings	45
Toucan crossings	51
Installations on Urban Traffic Control (UTC)	68
Installations remotely monitored (RMS)	186
Interactive speed signs	347

## 23 Environment Services Capital Programme 2010/2011

<b>Scheme</b>	<b>Capital Programme 2010/2011 £</b>	<b>Revised Capital Programme 2010/2011 £</b>
<b>Integrated Transport</b>		
Accessibility Promotion and Research	45,000	45,000
Accessibility Works	45,000	45,000
Air Quality Monitoring	15,000	15,000
Bus Infrastructure - Cambridge	330,000	130,000
Bus Infrastructure - Huntingdon	350,000	80,000
Cambridge Access Strategy	447,000	327,000
Civil Parking Enforcement	250,000	100,000
Community Transport/Rural Demand Responsive Buses	50,000	0
Cycleway Improvements	225,000	225,000
Inter-urban Corridor Bus Schemes	170,000	47,000
Inter-urban Corridor Other Schemes	100,000	28,000
Jointly Funded Minor Improvements	200,000	200,000
Major Roadworks	250,000	250,000
Major Safety Schemes	200,000	0
Major Scheme Development	375,000	375,000
Market Town Major Project - St Neots Cycle Bridge	500,000	500,000
Market Town Strategy Schemes	900,000	664,000
New Footpaths/Rural Pedestrian Improvements	80,000	67,000
Safer Routes to Schools	275,000	271,000
Safety Schemes (Medium size/October List)	800,000	800,000
Smarter Travel Management - HCV Routing	40,000	30,000
Smarter Travel Management - Int Highways Man Centre	350,000	350,000
Smarter Travel Management - Personalised Travel Plan	65,000	55,000
Smarter Travel Management - Real Time Bus information	250,000	250,000
Smarter Travel Management - Smartcard	72,000	72,000
Smarter Travel Management - Travel for Work	40,000	40,000
Smarter Travel Management - Traseline development	15,000	15,000
Speed Management	175,000	175,000
Strategy Development	175,000	175,000
The Busway	1,000,000	1,000,000
<b>Total Integrated Transport</b>	<b>7,789,000</b>	<b>6,331,000</b>
<b>Operating the Network</b>		
Carriageway Maintenance - Non-principal/Unclassified roads	4,305,000	4,706,000
Carriageway Maintenance - Principal roads	1,005,000	1,665,000
Footway Maintenance and Cycle Paths	2,075,000	814,000
Noise Reducing Road Surfaces	-	-
Rights of Way	140,000	140,000
Street Lighting	140,000	140,000
Strengthening of Bridges to carry 40 tonne loading	1,980,000	2,180,000
Structural Maintenance/Enhancement of existing Highway	533,000	533,000
Traffic Signal Replacement	655,000	655,000

16	Water Newton	Through Road	Surface Dressing	Mid May to end July	Steve Douglas
17	Chesterton	Oundle Road	Surface Dressing	Mid May to end July	Steve Douglas

**REVISED**

Countywide

## Countywide Works Programme 2010/2011

### AIR QUALITY

Sch No	Proposed for 2010/2011	Scheme details	Estimated £	Cumulative £	Proposed start	Project Manager
1	Website continuous monitoring	Continuance of City continuous pollutant monitoring on the web	5,000	5,000	Qtr1-4	Janet Martin
2	Air Quality monitoring equipment	Continuance of SCDC monitoring equipment co-located with traffic monitors	3,000	8,000	Qtr1-4	Janet Martin
3	Monitoring for Joint Air Quality Action Plan	Contribution to improving equipment required for monitoring of Joint Action Plan for Air Quality Management	7,000	15,000	Qtr1-4	Janet Martin
<b>Total</b>				<b>15,000</b>		

### CYCLING SCHEMES/NATIONAL CYCLE NETWORK

Sch No	Parish/Town	Road	Works	Budget £	3rd Party £	Scheme cost £	Cumulative £	Proposed start	Project Manager
1	Cambridge/ South Cambridgeshire	Cycle Parking	Construct		134,000	134,000	134,000	Qtr1-4	Mike Davies
<b>Total</b>				<b>0</b>	<b>134,000</b>		<b>134,000</b>		

See also Growth Area Fund below

### GROWTH AREA FUND

Sch No	Parish/Town	Road	Works	Budget £	3rd Party £	Scheme cost £	Cumulative £	Proposed start	Project Manager
1	Cambridge/ South Cambridgeshire	Addenbrookes Access Road	Complete construction		1,930,000	1,930,000	1,930,000	Qtr 1	Mike Eatock
<b>Total</b>				<b>0</b>	<b>1,930,000</b>		<b>1,930,000</b>		

### RIGHTS OF WAY

Sch No	Parish/Town	Works	Budget £	Cumulative £	Proposed start	Project Manager
1	Various	Byway management	20,000	20,000	Qtr1-4	Kate Day
2	Various	Bridges replacements	5,000	25,000	Qtr1-4	Kate Day
3	Various	Continuing upgrade of stiles with kissing gates throughout the network	17,000	42,000	Qtr1-4	John Cooper
4	Various	General signage improvements and repair throughout the network	10,000	52,000	Qtr1-4	John Sargeant
5	Various	Countryside general	50,000	102,000	Qtr1-4	Kate Day
6	Various	Survey and interpretation	6,700	108,700	Qtr1-4	Kate Day
<b>Total</b>				<b>102,000</b>		

### SAFETY SCHEMES

Sch No	Parish/Town	Road	Works	Budget £	Cumulative £	Proposed start	Project Manager
1	Countywide	Various - as identified by accident investigations	Minor accident remedial measures	150,000	150,000	Qtr1-4	Amanda Mays
<b>Total</b>					<b>150,000</b>		

**SPEED MANAGEMENT**

Sch No	Location	Estimated £	Cumulative £	Proposed start	Project Manager
1	A' and 'B' Road Speed Limit Review (Year 3)	175,000	175,000	Qtr 1	Richard Preston
		<b>Total</b>	<b>175,000</b>		

**BRIDGES: ASSESSMENT STRENGTHENING AND MAINTENANCE**

Sch No	Parish/Town	Bridge/Structure	Works	Budget £	Cumulative £	Proposed start	Project Manager
1	Various	Various	Road Rail Incursion barriers and measures	120,000	120,000	Qtr1-4	Gareth Guest
2	Various	Various	Reassessment for 40 tonne	75,000	195,000	Qtr1-4	Gareth Guest
3	Various	Various	Asset Management and asset valuation /depreciation	15,000	210,000	Qtr1-4	Gareth Guest
4	Various	Various	Interim Measures structure monitoring	20,000	230,000	Qtr1-4	Gareth Guest
5	Various	Various	Scheme design for 2011/2012	150,000	380,000	Qtr1-4	Gareth Guest
6	Various	Various	NRSWA at structures	3,000	383,000	Qtr1-4	Gareth Guest
7	Various	Various	Abnormal Load management	30,000	413,000	Qtr1-4	Gareth Guest
8	Various	Various	General inspections	80,000	493,000	Qtr1-4	Gareth Guest
9	Various	Various	Principal inspections	40,000	533,000	Qtr1-4	Gareth Guest
10	Various	Various	Accident damage, minor repairs, routine maintenance	200,000	733,000	Qtr1-4	Gareth Guest
11	Various	Various	Bridge Schemes refurbishment	500,000	1,233,000	Qtr1-4	Gareth Guest
		<b>Total</b>			<b>1,233,000</b>		

**ADDITIONAL FUNDING**

Sch No	Parish/Town	Works	Budget £	Cumulative £	Proposed start	Project Manager
1	Various	Road and Footway Improvement	550,000	550,000	Qtr1-4	Louise Collier
2	Various	Winter Maintenance	150,000	700,000	Qtr1-4	Louise Collier
3	Various	October List	300,000	1,000,000	Qtr1-4	David Frost
		<b>Total</b>		<b>1,000,000</b>		

## 25 Highways & Access National Indicator Targets

### NI 47 People killed or seriously injured (KSI) in road traffic accidents - LAA

	2007	2008	2009	2010
Actual	418	372	384	
Target		410	390	360

### NI 48 Children (aged 0-15 inclusive) killed or seriously injured in road traffic accidents

	2007	2008	2009	2010
Actual	29	22	23	
Target		27	26	24

### NI 167 Congestion – average journey time per mile during the morning peak (low figure is good)

	2007/08	2008/09	2009/10	2010/11
Actual	4.14	4.1		
Target		4.14	4.14	4.14

### NI 168 % of principal roads (i.e. non-trunk 'A' class roads) where maintenance should be considered (low figure is good)

	2007/08	2008/09	2009/10	2010/11
Actual	2%	2.1%	3%	
Target		3%	3%	3%

### NI 169 % of non-principal classified roads where maintenance should be considered (low figure is good)

	2007/08	2008/09	2009/10	2010/11
Actual	4%	5%	7%	
Target		6%	6%	7%

### NI 175 Access to services and facilities by public transport, walking and cycling

	2006/07	2007/08	2008/09	2009/10	2010/11
Actual	89.7%	94%	96.25%		
Target			89.7%	96%	96%

### NI 176 Working age people with access to employment by public transport (and other specified modes)

	2007/08	2008/09	2009/10	2010/11
Actual	79.7%	78.9%		
Target			79.0%	79.07%

### NI 177 Local bus passenger journeys originating in the authority area (per year) - LAA

	2006/07	2008/09	2009/10	2010/11
Actual	20.15	24.17 million		
LAA Targets		20.85 million	21.8 million	22.5 million
Local Targets			24.5 million	25.0 million

Note: Following the higher than predicted outturn for 2007/08, local targets were set reflecting the latest position at the time and also taking into account the fact that some of the anticipated effect of concessionary fares had been seen earlier than expected. New targets allow for the expected growth due to the guided busway and also recognising that passenger numbers can vary from one year to the next.

**NI 178 Bus services running on time**

	<b>2008/09</b>	<b>2009/10</b>	<b>2010/11</b>
<b>Actual – Non- frequent</b>	70%		
<b>Target – Non-frequent</b>	70%	71%	73%
<b>Actual – Frequent service (Excess waiting time)</b>	0.7 minutes		
<b>Target – Frequent service</b>	0.88 minutes	0.88	0.88

**NI 198 Children travelling to school by car****LAA Targets (CCC Data)**

	<b>2006/07</b>	<b>2007/08</b>	<b>2008/09</b>	<b>2009/10</b>	<b>2010/11</b>
<b>Actual</b>	23.75%	22.15%	21.46%	20.38%	
<b>Target</b>			22%	21%	20%

**LOCAL Targets (DCSF Data)**

	<b>2006/07</b>	<b>2007/08</b>	<b>2008/09</b>	<b>2009/10</b>	<b>2010/11</b>
<b>Actual</b>	24.4%	23.6%	22.14%	21.04%	
<b>Target</b>			23.45%	22.5%	21.4%

Note: 2008 DCSF results for NI 198 were published after LAA targets agreed. LAA baseline and targets were based on CCC figures for % of all school pupils travelling by car or van, including nursery schools, but excluding travel by taxi. DCSF figures exclude non-responses from the denominator & exclude nursery schools, but include travel by taxi.

## 26 Highways & Access Performance

Frequency	Measure	What is good?	Format	Data for period:	Actual	Target	Status	Year End Prediction Status
