

- Brickwork
- Brown multi-rustic to match existing
- Windows
- White powder coated aluminium frames to match existing
- Doors
- White powder coated aluminium doors and frames to match existing
- Roof Covering
- Grey bituminous felt flat roof covering

external wall raised with new aluminium coping

powder coated aluminium framed gutter and fascia

Architectural elevation drawing of the rear of the building. The drawing shows a long, low structure with a flat roof. On the left, there is a set of double doors labeled "Ceremony Staging Room". To the left of the doors is a window labeled "window sealed and glazing covered in obscure film". To the right of the doors is another window labeled "window opening enlarged and new glazed doors fitted". Further right is a window labeled "window sealed". To the right of that is a section labeled "powder coated aluminium framed gutter and fascia". The main part of the building features a series of windows: a large double window, followed by two smaller double windows, and then a set of four steps leading up to a double door. The entire building is labeled "new powder coated aluminium framed windows and doors" at the bottom.

WEST ELEVATION 'D'

new double doors

new Plant Room doors

powder coated aluminium gutter and fascia

fascia containing signage

brickwork taken down, timber doors and windows removed and new powder coated aluminium framed windows and doors fitted

concrete ramp and handrails removed

## GROUND FLOOR PLAN AS PROPOSED
