The service level budgetary control report for January 2018 can be found in $\frac{\text{appendix 1}}{\text{appendix 2}}$.

2.2 Significant Issues

2.2.1 Waste Private Finance Initiative (PFI) Contract

We are currently forecasting the Waste PFI budget to be around £1.6m overspent. This is largely due to an increase in the quantity of waste collected compared to the forecast, lower levels of Third Party Income through the contract, an increase in the amount of bulky waste collected that is sent direct to landfill, an increased quantity of material rejected from the In-Vessel Composting process, rising costs for recycling wood and rigid plastics collected at Household Recycling Centres and a shortfall in the delivery of savings for the current financial year – it is expected that these will however be delivered next year. Although the Mechanical Biological Treatment (MBT) plant has performed slightly better than the 2016/17 performance levels, the savings this has delivered are not sufficient to offset the additional pressures.

The variable nature of the MBT creates significant uncertainty in the forecast and actual performance could improve (and the forecast overspend reduce) or worsen (and the overspend increase). There are also historic disputes to consider, which are not factored into any of the above.

A number of predicted underspends have been identified across ETE, (either one-off, which will help offset the waste pressure this financial year, or ongoing, which can be brought out in the Business Plan) which can be used to offset the pressure in waste. The areas which are predicted to underspend (or achieve additional income) are Concessionary Fares, Traffic Signals, Streetlighting, Highways income and City centre access cameras.

2.2.2 Winter Maintenance

This budget is expected to overspend due to the number of gritting runs that have taken place in November to January compared to previous years. For this year 45.5 runs have taken place compared to 35.5 runs that took place over the same period last year. We are now forecasting 50 runs for the year based on the estimated expected runs for the remainder of the year comparing to previous years. The Highways budget is expected to cover the overspend on the winter maintenance service.

2.3 Additional Income and Grant Budgeted this Period (De minimis reporting limit = £30,000)

There were no items above the de minimis reporting limit recorded in January 2018. A full list of additional grant income can be found in <u>appendix 3</u>.

2.4 Virements and Transfers to / from Reserves (including Operational Savings Reserve)

(De minimis reporting limit = £30,000)

There are no items above the de minimis reporting limit recorded in January 2018.

A full list of virements made in the year to date can be found in appendix 4.

3. BALANCE SHEET

3.1 Reserves

A schedule of the Service's reserves can be found in appendix 5.

3.2 Capital Expenditure and Funding

Expenditure

3.2.1 Ely Southern By Pass

The construction target cost for the contract was £27.4m at the time of award of Stage 2. Whilst work is progressing on site, some significant risks have emerged requiring additional work, including Network Rail requirements, the diversion of statutory undertakers' plant, buildability issues arising from the complex V piers and additional temporary works resulting from poor and variable ground conditions. These will increase the outturn cost of the scheme significantly and are currently being considered with the contractor to minimise the impact on the project and to reduce the cost impact.

The completion date is likely to be late summer/Autumn 2018 depending on weather. The Council is working with the contractor to identify options to mitigate against delay and minimise costs. A number of value engineering opportunities are also being explored.

The current expected expenditure for 17/18 financial year is £3.8m below budget. This is due to the extended construction programme. As a reduced quantity of construction work is anticipated during the 17/18 financial year there is in turn a reduced anticipated spend.

3.2.2 Scheme Development for Highways Iniatives

To shortlist schemes for development, discussions have been required with Members. This has meant that the Committee did not approve schemes for development until February 2018 meaning that new schemes could not be developed until this point.

3.2.3 Soham Station

Network Rail who will be constructing the work on this scheme have submitted a spend profile that is not as was originally expected. This means that more spend will be carried out in 2018-19 than was originally expected. Due to the increase in cost for the next stage of work further discussion has been required before we could progress with the next stage of work GRIP3. Network Rail have now provided a revised forecast of spend.

Funding

All other schemes are funded as presented in the 2017/18 Business Plan.

A detailed explanation of the position can be found in <u>appendix 6</u>.

4. **PERFORMANCE**

4.1 Introduction

This report provides performance information for the suite of key Economy, Transport & Environment (ETE) indicators for 2017/18. At this stage in the year, we are still reporting pre-2017/18 information for some indicators.

New information for red, amber and green indicators is shown by Committee in Sections 4.2 to 4.4 below, with contextual indicators reported in Section 4.5. Further information is contained in Appendix 7.

4.2 Red Indicators (new information)

This section covers indicators where 2017/18 targets are not expected to be achieved.

a) Economy & Environment

No new information this month.

b) ETE Operational Indicators

No new information this month.

4.3 Amber indicators (new information)

This section covers indicators where there is some uncertainty at this stage as to whether or not year-end targets will be achieved.

a) Economy & Environment

Economic Development

 The percentage of 16-64 year-old Cambridgeshire residents in employment: 12month rolling average (to June 2017)

The latest figures for Cambridgeshire have recently been published by the Office for National Statistics (ONS).

The 12-month rolling average is 79.2%, which is a slight increase from the last reported quarterly rolling average figure of 78.5% as at the end of June 2017. This said, it is still below the 2016/17 target range of 80.9% to 81.5%. It is above both the national figure of 74.5% and the Eastern regional figure of 77.3%.

79.6% are employed full time and 20.4% are employed part time.

% of 16-64 year-old Cambridgeshire residents in employment: 12month rolling average

Traffic and Travel

 Percentage of adults who walk or cycle at least once a month – narrowing the gap between Fenland and others (2015/16)

Latest figures published by the Department for Transport show that in 2015/16, 73.7% of Fenland residents walked or cycled at least once a month. This a reduction compared with 2014/2015 (81.1%).

It is worth noting that because the indicator is based on a sample survey, the figure can vary from one survey period to the next, and the change since 2013/14 is not statistically significant. For instance the sample size for Fenland was 360 people and the sample size for the whole of Cambridgeshire was 2,323.

Excluding Cambridge, the latest figure for the rest of the County is approximately 80.6%. The gap of 7.0 percentage points is less than the 204/15 gap of 8.3 percentage points. The 2012/13 baseline gap was 8.7 percentage points.

b) ETE Operational Indicators

No new information this month

4.4 Green Indicators (new information)

The following indicators are currently on-course to achieve year-end targets.

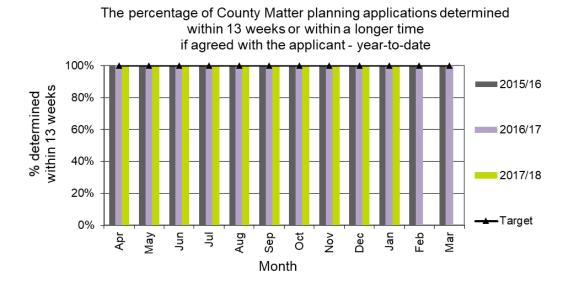

a) Economy & Environment

Planning applications

The percentage of County Matter planning applications determined within 13
 weeks or within a longer time period if agreed with the applicant - year-to-date (to
 January 2018)

Thirteen County Matter planning applications have been received and determined on time since the beginning of the 2017/18 financial year.

There were 10 other applications excluded from the County Matter figures. These were applications that required minor amendments or Environmental Impact Assessments (a process by which the anticipated effects on the environment of a proposed development is measured). 100% of these were determined on time.

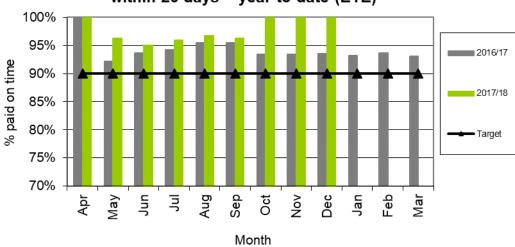

b) ETE Operational Indicators

Freedom of Information (FOI) requests

FOI requests - % responded to within 20 days (December 2017)
 12 Freedom of Information requests were received during December 2017.
 Provisional figures show that all 12 (100%) of these were responded to on time.

186 Freedom of Information requests have been received since April 2017 and 97.3% of these have been responded to on-time. This compares with 93.5% (out of 261) and 97.9% (out of 238) for the same period last year and the year before.

Percentage of FOI requests answered within 20 days - year-to-date (ETE)

Complaints and representations - response rate

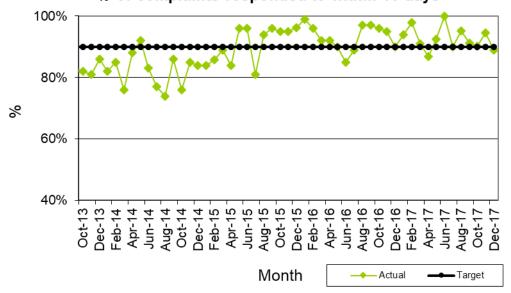

Percentage of complaints responded to within 10 days (December 2017)
 38 complaints were received in December 2017. 34 (89%) of these were responded to within 10 working days.

31 complaints were for Infrastructure Management & Operations and 27 (87%), were responded to on time.

7 complaints were for Strategy & Development and all 7 (100%), were responded to within 10 working days.

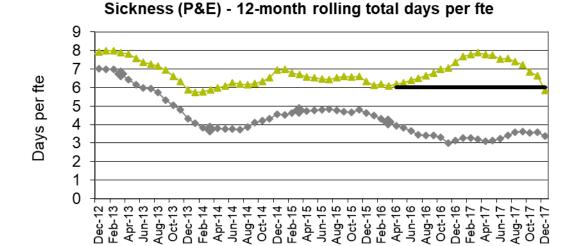

The year-to-date figure is currently 92%.

% of complaints responded to within 10 days

• <u>Economy, Transport & Environment staff sickness per full time equivalent (f.t.e.)</u> - 12-month rolling average (to December 2017)

The 12-month rolling average has fallen slightly to 3.4 days per full time equivalent (f.t.e.) and is below (better than) the 6 day target.

12 months ending

Target

During December the total number of absence days within Economy, Transport & Environment was 95 days based on 540 staff (f.t.e) working within the Service. The breakdown of absence shows that 94 days were short-term sickness and 1 day was long-term sickness.

4.5 Contextual indicators (new information)

→ ETE

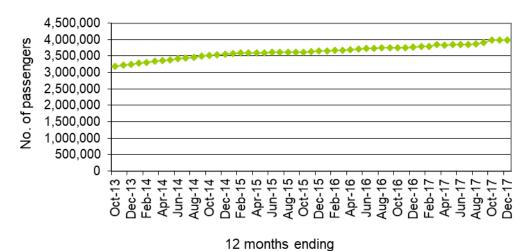

a) Economy & Environment

- CCC

Passenger Transport

• <u>Guided Busway passenger numbers (December 2017)</u>
The Guided Busway carried 323,578 passengers in December. There have now been over 22.5 million passengers since the Busway opened in August 2011. The 12-month rolling total is 3.98 million.

Guided Busway passengers: 12-month rolling total

APPENDIX 2 – Commentary on Forecast Outturn Position

Number of budgets measured at service level that have an adverse/positive variance greater than 2% of annual budget or £100,000 whichever is greater.

Service	Current Budget for 2017/18	Current	Variance	Variance		
	£'000	£'000	%	£'000	%	
Executive Director	1,564	+119	+6	+246	+16	

The review of Senior management within ETE has completed with implementation on 1st January 2018. This limits the amount of savings that can be made in this financial year. The full year will save up to £250k.

Waste Disposal High 111 34,000 -01 -0 +1,004 +3	Waste Disposal incl PFI	34,080	-81	-0	+1,604	+5
--	-------------------------	--------	-----	----	--------	----

We are currently forecasting the Waste PFI budget to be around £1.6m overspent. This is largely due to an increase in the quantity of waste collected compared to the forecast, lower levels of Third Party Income through the contract, an increase in the amount of bulky waste collected that is sent direct to landfill, an increased quantity of material rejected from the In-Vessel Composting process, rising costs for recycling wood and rigid plastics collected at Household Recycling Centres and a shortfall in the delivery of savings for the current financial year – it is expected that these will however be delivered next year. Although the Mechanical Biological Treatment (MBT) plant has performed slightly better than the 2016/17 performance levels, the savings this has delivered are not sufficient to offset the additional pressures.

The variable nature of the MBT creates significant uncertainty in the forecast and actual performance could improve (and the forecast overspend reduce) or worsen (and the overspend increase). There are also historic disputes to consider, which are not factored into any of the above.

A number of predicted underspends have been identified across ETE, (either one-off, which will help offset the waste pressure this financial year, or ongoing, which can be brought out in the Business Plan) which can be used to offset the pressure in waste. The areas which are predicted to underspend (or achieve additional income) are Concessionary Fares, Traffic Signals, Streetlighting, Highways income and City centre access cameras.

The signals budget is expected to underspend by £100k mainly due to savings from a new contract and savings on energy. There is also expected to be an increase in income of £65k for Temporary Traffic Regulation Orders (TTRO), however the income for New Roads and Street Works Act (NRSWA) charges is behind expected budgeted position. This underspend will be used to help cover the pressure on the Waste budget.

66,263	Total including Capital Programme variations	76,618	40,299	74,748	-1,870		

The increase between the original and revised budget is partly due to the carry forward of funding from 2016/17, this is due to the re-phasing of schemes, which were reported as underspending at the end of the 2016/17 financial year. The phasing of a number of schemes has been reviewed since the published business plan and this has included a reduction in the required budget in 2017/18, for King's Dyke. This still needs to be agreed by GPC.

Three additional grants have been awarded since the published business plan, these being Pothole grant funding, the National Productivity fund and the Challenge Fund.

The Capital Programme Board have recommended that services include a variation budget to account for likely slippage in the capital programme, as it is sometimes difficult to allocate this to individual schemes in advance. As forecast underspends start to be reported, these are offset with a forecast outturn for the variation budget, leading to a balanced outturn

overall up to the point when slippage exceeds this budget. The allocations for these negative budget adjustments have been calculated and shown against the slippage forecast to date.

Operating the Network

One of the signals schemes will be delayed until 2018/19, as traffic modelling work needs to be completed to determine the final design options. The scheme is on Cherry Hinton Road, Cambridge at the Queen Ediths Way / Robin Hood junction. The scheme is funded by developer contributions and expected cost is £556k.

Safer Roads Fund

A successful bid was made to Department for Transport (DfT) to secure £1,300,000 worth of funding from the Safer Roads Fund. This funding is specifically for safety improvements on the A1303. The scheme will be completed in 2018/19.

Cambridgeshire Archives

When last assessed it was assumed that a third of the construction work would be delivered in 2017/18. The latest schedule received from the Contractor indicates that all construction work will now start in May 2018, therefore £3.778m of the £3.817m capital budget will be required in 2018/19. However, the scheme is still on track to complete in 2018/19.

King's Dyke

Negotiations on land acquisition are progressing and land costs have been established. It is anticipated that contracts will be exchanged very shortly. However, it is not expected that completion on all the land acquisitions will be made before the end of March. This amount has now been removed from the spend profile for the 2017-2018 year and will be carried into the first quarter of 2018/19.

Kier, the appointed contractor, has commenced on the Stage 1 contract for detailed design. Progress has been slower than expected owing to delays in agreeing access to land for ground investigation. Further and more detailed land and ground survey work is required to feed into the design and the first of the Ground Investigation (GI) works are expected to start early in mid-February. This will involve trial holes in the existing A605 to locate and survey the public utility services within the road and verges, vegetation clearance and any remaining GI surveys. The design will inform a more robust construction target price prior to award of the Stage 2 contract for construction. Slower progress has reduced this year's expenditure on Stage 1 of the contract.

Negotiations with statutory undertakers on the scope of diversions is continuing. We are expecting to make payment to one provider in early February with 3 others in March. The final provider we expect to make payment in April, which has been reflected in the spend profile.

The current business plan forecast remains at £13.6m based on early estimates. As previously reported to Economy and Environment (E&E) Committee, the estimated cost could increase and an upper possible figure of £16.9m was indicated. Stage 1 will provide an opportunity to assess in more detail the potential risks, including ground conditions,

statutory undertakers' costs, Network Rail requirements and any associated construction difficulties. It will also provide the opportunity to undertake value engineering exercises to provide a more economical design. Any additional funding requirements, will be reported to the E&E Committee and GPC.

Ely Southern By Pass

The construction target cost for the contract was £27.4m at the time of award of Stage 2. Whilst work is progressing on site, some significant risks have emerged requiring additional work, including Network Rail requirements, the diversion of statutory undertakers' plant, buildability issues arising from the complex V piers and additional temporary works resulting from poor and variable ground conditions. These will increase the outturn cost of the scheme significantly and are currently being considered with the contractor to minimise the impact on the project and to reduce the cost impact.

The completion date is likely to be late summer/Autumn 2018 depending on weather. The Council is working with the contractor to identify options to mitigate against delay and minimise costs. A number of value engineering opportunities are also being explored.

The current expected expenditure for 17/18 financial year is £3.8m below budget. This is due to the extended construction programme. As a reduced quantity of construction work is anticipated during the 17/18 financial year there is in turn a reduced anticipated spend.

Abbey - Chesterton Bridge

This project is still in the process of discharging planning conditions to enable works to start on site..

Originally, planned spend for 2017/18 was £1,917,000 but now looks to be £300,000. The planning application was submitted in July 2016 and it was anticipated that this process would complete by Autumn 2016, with construction of the bridge in late 2017, and thus significant construction related spend could be achieved.

The planning permission was not granted until February 2017 following the need to submit multiple packages for certain aspects of the application. Construction now looks likely to commence in March 2018, though this is dependent upon discharging the pre-start planning conditions.

Significant spend will not be encountered until the construction work actually commences, thus the majority of spend will now come in 2018/19 rather than 2017/18.

A contractor is currently mobilising resources to commence the required scrub clearance and tree felling before the bird nesting season commences.

Huntingdon – West of Town Centre Link Road

The outturn for the scheme has reduced to £665,000 from £1,510,000, this is due to land cost claims which have not been resolved as anticipated and it is now expected these claims will be resolved in 2018/19.

Cambridge Cycling infrastructure

This is the programme of S106 funded cycling projects in Cambridge. The funding is generally not time limited, and thus any underspend rolls into the next year. The original planned spend was £1,580,000 but now looks to be around £100,000. This is a consequence of public consultation and scheme development work being extended, not least Queen Edith's Way, which is the project with the largest single budget.

Following consultation, E&E Committee agreed to undertake further development and consultation with local residents. The delivery team's priority has been to complete projects that have some time limited funding associated with them such as DfT Cycle City Ambition funded schemes and St Neots Northern foot and cycle bridge, and to progress some of the higher profile projects such as Abbey-Chesterton Bridge.

Cycle City Ambition Grant

- **A10 Harston** Scheme substantially complete with minor works required to tidy up verges. Current spend suggests a slight overspend for the year but a contribution from the Traffic Signals Team towards the costs is yet to be received so therefore still on track to achieve spend forecast of £1,130,000 for the year;
- **Trumpington Road** Scheme recently completed with a few minor snagging items. Spend coming in very close to the original forecast of £480,000 now that a contribution towards the works has been received from the Traffic Signals Team;
- **Quy to Lode** Scheme substantially complete 2km new village link. Final costs coming in slightly higher than the original spend forecast of £451,000 for the year, due to the need to import more sub-base material to address level differences.

Major Scheme Development and Delivery – Relocation of BT poles has been ordered in advance of a new foot and cycleway being built in the future on the A1198 between Papworth and Cambourne. Preliminary design work is underway to determine the feasibility of improved street lighting on West Fen Road, Ely and a new foot and cycleway between Burwell and Exning.

Milton Road to Cambridge North Station - This project is now substantially complete apart from some minor snagging issues. The previous Network Rail Track is to become public highway and the adoption process is underway. There will be some fees and charges associated with this process either in 2017/18 or 2018/19 depending on the date of adoption.

Cambridgeshire Busway Lighting - This project is now complete and operational. There is a requirement to pass on a commuted sum of £50k for maintenance purposes from 2018/19.

Scheme Development for Highways Iniatives

To shortlist schemes for development, discussions have been required with Members. This has meant that the Committee did not approve schemes for development until February 2018 meaning that new schemes could not be developed until this point.

Soham Station

Network Rail who will be constructing the work on this scheme have submitted a spend profile that is not as was originally expected. This means that more spend will be carried out in 2018-19 than was originally expected. Due to the increase in cost for the next stage of work further discussion has been required before we could progress with the next stage of work GRIP3. Network Rail have now provided a revised forecast of spend

Connecting Cambridgeshire

Expenditure in this year will be lower than estimated in relation to the BT contract. To confirm, delivery is on track but expenditure has been re-phased, and therefore the funding will be required next financial year.

Capital Funding

75,927 -9,664	Capital Programme variations	91,640 -15,022	74,748	-16,892 16,892	
66,263	Total including Capital Programme variations	76,618	76,618	0	

Funding	Amount (£m)	Reason for Change
Rolled Forward Funding	6.0	This reflects slippage or rephasing of the 2016/17 capital programme to be delivered in 2017/18 which will be reported in August 17 for approval by the General Purposes Committee (GPC)

Additional / Reduction in Funding (Specific Grant)	-9.0	Rephasing of grant funding for King's Dyke (-£1.0m), costs to be incurred in 2018/19. Grant funding for Ely Crossing now direct from DfT previously part of Growth Deal funding (-£8.3m)
Revised Phasing (Section 106 & CIL)	-0.8	Revised phasing of Guided Busway spend and receipt of developer contributions.
Revised Phasing (Other Contributions)	-3.2	Revised phasing of King's Dyke spend
Additional Funding / Revised Phasing (DfT Grant)	16.3	New Grant funding – National Productivity Fund (£2.9m), Pothole Action Fund (£1.2m), Challenge Fund (£3.5m) and Safer Roads Fund (£1.2m). Grant funding for Ely Crossing now direct from DfT previously part of Growth Deal funding (£11.3m)
Additional / Reduction in Funding (Prudential borrowing)	-1.0	Rephasing of grant funding for Ely Crossing reduced the requirement for borrowing (-£3.0m). Brought forward borrowing to fund DfT Challenge Fund schemes (£2.25m).

The increase between the original and revised budget is partly due to the carry forward of funding from 2016/17, this is due to the re-phasing of schemes, which were reported as underspending at the end of the 2016/17 financial year. The phasing of a number of schemes have been reviewed since the published business plan and this has included a reduction in the required budget in 2017/18, for King's Dyke.

Four additional grants have been awarded since the published business plan, these being Pothole grant funding, the National Productivity fund, Challenge Fund and Safer Roads Fund.

	Operating Model Outcome:	The Cambrid	geshire eco	nomy prospers	to the benefit of	all Cambridges	hire residents		
Monthly	Guided Busway passengers per month	High	1	To 31 December 2017	393,512		Contextual		The Guided Busway carried 323,578 passengers in December. There have now been over 22.5 million passengers since the Busway opened in August 2011. The 12-month rolling total is 3.98 million.
	Operating Model Outcome:	The Cambrid	geshire eco	nomy prospers	to the benefit of	all Cambridges	hire residents		
Yearly	Local bus passenger journeys originating in the authority area	High	1	2016/17	Approx. 18.7 million	19 million	Α	Α	There were over 18.7 million bus passenger journeys originating in Cambridgeshire in 2016-7. This represents an increase of almost 2% from 2015-6; this growth can probably be attributed to the continued increase in passenger journeys on the guided busway. As predicted last year the target of 19 million bus passenger journeys was not achieved, but it still is anticipated that there is a chance of growth in the future through the City Deal and if so, this will take place in 2017-8 at the earliest.
Planning appl	ications

	Growth in cycling from a 2004/05 average baseline	High	1	2015	62.5% increase	70% increase	G	G	There was a 4.7 per cent increase in cycle trips in Cambridgeshire in 2015. Overall growth from the 2004-2005 average baseline is 62.5 percent which is better than the Council's target of 46%.
Yearly	% of adults who walk or cycle at least once a month – narrowing the gap between Fenland and others	High	\	October 2016	Fenland = 73.7% Other excluding Cambridge = 80.6%	Fenland = 86.3%	Α	Α	Latest figures published by the Department for Transport show that in 2015/16, 73.7% of Fenland residents walked or cycled at least once a month. This a reduction compared with 2014/2015 (81.1%). It is worth noting that because the indicator is based on a sample survey, the figure can vary from one survey period to the next, and the change since 2013/14 is not statistically significant. For instance the sample size for Fenland was 360 people and the sample size for the whole of Cambridgeshire was 2,323. Excluding Cambridge, the latest figure for the rest of the County is approximately 80.6%. The gap of 7.0 percentage points is less than the 204/15 gap of 8.3 percentage points. The 2012/13 baseline gap was 8.7 percentage points.
