TABLE 4: DIVISIONS OUTSIDE 10% VARIANCE RESULTING FROM SCENARIO V3.0 FOR 63 MEMBERS IN 2014 AND 2020

District	% EDs		% EDs	
	EDs >10% 2014	exceeding 10%	EDs >10% 2020	exceeding 10%
Cambridge City	6	50%	1	8%
East Cambridgeshire	1	11%	1	11%
Fenland	1	10%	1	10%
Huntingdonshire	7	41%	1	6%
South Cambridgeshire	5	33%	1	7%
Cambridgeshire	20	32%	5	8%

*N.B. Provided the forecasts are robust over time and planned developments continue, the resulting 2020 variances would not be sufficient to trigger another review i.e. there is not more than 30% of divisions with variance greater than 10% and no divisions have a variance of more than 30%. This is not a guarantee that the LGBCE would accept the scenario unchanged, or that a review would not occur in 2020. Only sufficient supporting evidence of community cohesion can support a proposal with the variances reported here.

*N.B. Some forecast figures are unrounded for the purpose of producing the new electoral divisions only. Forecast are normally rounded to the nearest 10 for small areas, the nearest 100 for districts, and the nearest 1000 for the county so not to give a false impression of the level accuracy possible.
