Introduction

The care and treatment of patients at Winterbourne View was very bad.

People should have good and safe care. People should feel safe and happy.

Care and support needs to be better for people with a learning disability or autism.

This plan is about how we would like to make care and support better for adults with a learning disability or autism in Cambridgeshire and Peterborough.

And **we want your opinions.**

What we plan to do

This **consultation** is about plans to pay for specialist hospital beds for people who have a learning disability or autism.

This change is needed so that we can make services in your **community** better.

This is so patients get care and support closer to their homes.

It is also about how we support people with a learning disability or autism out of hospital.

The Hollies in Peterborough

We want you to have your say on how we plan to make services better for adults with a learning disability or autism in Cambridgeshire and Peterborough.

When we have your views at the end of the **consultation** we will make a final plan on how we can make services better for you and need less **specialist hospital beds**.

Why we need to do it

The need to transform care started after people with a learning disability were abused at **Winterbourne View**.

After what happened at Winterbourne View, a Government report called **Building the Right Support** told us what we needed to do to start making things better.

This job was given to Transforming Care Partnerships (TCPs).

Transforming Care is about making care and support better for people with a learning disability, autism, or both who need extra support during times of distress or illness.

We want there to be less specialist hospitals in the future.

With the right support people should be able to live in their own homes they have chosen in their **communities**.

At the moment in Cambridgeshire and Peterborough we pay for 10 hospital beds at the Hollies and support in the community. We also pay for some patients to be in hospital beds outside of Cambridgeshire and Peterborough.

What we need to do

Fewer hospital beds

People should only go into specialist hospital if:

- they are at risk of hurting themselves or other people
- when assessment and treatment cannot safely be given in the community.

Care and treatment in hospital must be what is right for the patient.

It must aim to get people well and back in to the community.

People should be in hospital for as little time as possible.

Plans for people to come out of hospital should be made as soon as the person goes in to hospital.

Hospitals should work with community services to make sure people get the right support when they leave hospital.

Better support in the community

Enhanced community support.

It means expert community support in the community for people with a learning disability or autism and who need extra support.
