

Highways & Transport (H&T) Committee feedback on Business and Financial Plan 2024-29

Meeting held 23 January 2024

The H&T Committee welcomed the investment in highways, including schemes such as the A10 and work on gullies, and in footways, streetlighting, signage, cycleways and weeding.

The H&T Committee sought clarification on

- The payback period for streetlighting.
- The allocation of gullies funding based on assessment of need.
- How funding on public rights of way differs revenue and capital, and that there is more investment in the general maintenance from £0.4 million more revenue.
- The £20 million investment and how this would be spent. It was confirmed that this will come back to Committee.

Following discussion surrounding recent events and a call for more on prevention, preparation and response, the H&T Committee asked that Strategy, Resources and Performance Committee consider further investment into Emergency Planning.
