

Environment and Green Investment Committee: 18 April 2024

Amendment proposed by Councillor Steve Count,

Additions in bold and deletions shown in strikethrough

4. Heat Pumps for Friday Bridge

The Committee is recommended to:

- ~~a) Agree that the Heat Pumps for Friday Bridge project should proceed to installation works for the limited number of properties that have signed up for the scheme. This could be either:
 - ~~I. Continuing as Phase 2b of the Heat Pump Ready programme, if DESNZ permit this~~
 - ~~II. Using Boiler Upgrade Scheme funding as outlined in Section 3.2~~~~
- ~~b) Agree that the Heat Pumps for Friday Bridge Consortium includes a private finance offer for residents wishing to proceed with a heat pump installation and requiring finance to do so and that residents be encouraged to compare this with other sources of borrowing (see section 3.3).~~
- a) Delay considering this proposal for one year, or after the Government has indicated how it proposes to rebalance the costs of Gas and Electric, whichever comes soonest.**
