

ADULTS POSITIVE CHALLENGE PROGRAMME

Adults Committee update
8 March 2018

What is the purpose?

Provide a sound baseline analysis of Adult Service & potential financial challenge

Introduce new ideas & innovation to explore the approaches to deliver sustainable services and maximise independence

Engage staff and wider stakeholders to shape & own the opportunities to transform Adult Services

Define a programme of change & quantify the impact on future cost

Baseline analysis findings

- Despite low expenditure, Cambridgeshire delivers average outcomes compared to other authorities.
- But continued pressures mean that the service model must change significantly to be sustainable.
- The Council has made good progress in improving people's independence, achieving above average performance in helping service users to live independently at home, rather than in residential care.
- More work is needed to embed the changes described in Transforming Lives and support more people to live independently.

Emerging themes for change

Empower providers to innovate, embedding reablement & assistive technology in the core offer, adopting an '*outcome based*' approach

Define a **different relationship** between the Council and citizens to build on their strengths, maximise independence & use community resources

Empower our staff to make decisions & drive change initiatives at scale

Shape support & care at a local level, in collaboration with health, voluntary sector and communities

Use **digital** to **put the client in control** of their care choices, their budget & provider relationship

Key opportunities

12 specific opportunities, including:

Embedding independence in social care practice

Neighbourhood-based support model

Technology-enabled care and better digital engagement

What next?

- Refining the proposals
- Developing a vision
- Developing a clear and workable programme plan
- Engagement during April to:
 - Share the proposed vision and opportunities with elected Members and staff across the Council
 - Discuss the findings and proposed opportunities with partners
 - Consider and discuss the scale of joint implementation across Cambridgeshire and Peterborough
 - Identify the requirement for any additional investments, capacity and expertise
