Specialist Operational Equipment sharing with Police and Ambulance Service	Cambridgeshire Fire & Rescue Service (CFRS) and Cambridgeshire Constabulary (CC) each individual service has, for individual business needs, obtained and trained staff on specialist operational equipment. In most cases this equipment comes with a significant financial cost as well as a significant training and development cost. Under these circumstances it would make it an inefficient use of tax payer's money and services time to hold this specialist equipment individually. However it does add to efficiency and effectiveness whilst adding value to the community for services to have in place a Memorandum of Understanding to enable access to the specialist equipment and trained staff.
