Item 10: Adults Corporate Performance Monitoring Report Q2 2024/25

Question from:	Question/ comment:
Daniel Fulton	While it is acknowledged that the indicators in the performance report may accurately reflect some aspects of the council's performance in the area of adult social care, much of the demand and expenditure is driven by clients with relatively high needs. Would the chair be willing to ask officers to consider developing other performance indicators that focus on this particular subset of social care demand?
