

Appendix 1. Update

Health and Well Being Board

Report on Delayed Transfers of Care, Better Care Fund and CQC Area Review

24th April 2018

Since the issue of the report, the latest national delayed transfers of care numbers have been published, by the Department of Health and Social Care, for the month of February 2018. In order to provide the Board with the most up to date position, this is attached. This shows that the overall improvement that commenced after August 2017 has been maintained with 5 out of the last six months showing a month on month improvement. This is particularly significant for the County Council who have now moved from the fourth to the third quartile of performance nationally (i.e. from 131st in August to 94th out of 152 Local Authorities in February). The Council's performance now compares favourably to other similar local authorities. That said, it is recognised that there remain a number of significant system challenges, which the Council continues to work on with its NHS partners in order to improve the overall experience of residents.
